

The Frasca KingAir FTD

Aircraft Specific Simulation for KingAir Aircraft
Customers: SimuFlite/QuickTurn, EPAG

Frasca manufactures a variety of FTDs for KingAir aircraft training. Realistic and affordable, these devices feature state of the art technology & the reliability Frasca is known for. Custom devices have been built for the C90 (for SimuFlites QuickTurn program - panel photo) and the B200 (for EPAG, France -exterior photo) These devices can be FAA certified as required.

KingAir Features Include:

- FVS-200TX visual system featuring photographic texture.
- 4 window collimated beam splitter display system.
- Dynamic control loading system.
- DSP based sound system.
- FAA Level 5 capable.

- Graphical Instructor Station (GIST)
- Crew Oxygen
- Functional Circuit Breakers
- Human engineered for safety, ease of maintenance and ease of operation.

Many options are available on Frasca FTDs, including: enclosed instructor cab, collimated visual system, EFIS, electric control loading, digital sound and others.
